

Learn Git and GitHub without any code!

Using the Hello World guide, you'll start a branch, write comments, and open a pull request.

[Read the guide](#)

 [singh007pravesh](#) / [Machine-Learning-projects-](#)

Quick setup — if you've done this kind of thing before

 Set up in Desktop or [HTTPS](#) [SSH](#) `git@github.com:singh007pravesh/Machine-Learning-projects-.git` 

Get started by [creating a new file](#) or [uploading an existing file](#). We recommend every repository include a [README](#), [LICENSE](#), and [.gitignore](#).

...or create a new repository on the command line

```
echo "# Machine-Learning-projects-" >> README.md
git init
git add README.md
git commit -m "first commit"
git remote add origin git@github.com:singh007pravesh/Machine-Learning-projects-.git
git push -u origin master
```

...or push an existing repository from the command line

```
git remote add origin git@github.com:singh007pravesh/Machine-Learning-projects-.git
git push -u origin master
```

...or import code from another repository

You can initialize this repository with code from a Subversion, Mercurial, or TFS project.

[Import code](#)

 **ProTip!** Use the URL for this page when adding GitHub as a remote.
